

Introducing the **Global** series

optimus™

Online Personal Time and Information Management Utility System — On the outside, a large, easy to read display and familiar ATM-style interface. On the inside, functionality far beyond old fashioned Time & Attendance and Payroll terminals. The Optimus Station is a full-service/self-service terminal that allows for both the input and output of information to help HR professionals manage their business.

- Large, easy to read display
- Familiar ATM-style interface - Self Service functionality
- Manager and employee review and approve time cards
- Biometric options for increased personal security
- 10 programmable function keys
- 100% backward compatible to the ATS Maximus and Prodigy
- Advanced file management and diagnostics
- Expandable memory for increased capacity and functionality

maximus™

The state-of-the-art internet appliance that removes limitations through use of open standards. Designed for those who demand more: Java programmability, plug and play, web services, open standards, complete field upgradeability, customized keypad overlay and display lens for unique branding.

- Internet appliance
- HR-expert™ available
- Java programmable
- Plug and play
- Fully interactive
- Eight programmable function keys
- Onboard & remote browser-based set-up
- Field upgradeable – never outdated
- Biometric option eliminates costly buddy punching
- Ultra-rugged cast aluminum enclosure
- Key-lockable, hinged base

prodigy™

The ideal blend of performance, function, style, and affordability. Prodigy™ is for those who demand a rich suite of features at an affordable price: plug and play, web services, customizable function keys, optional biometrics & more!

- Internet appliance
- Plug and play
- Onboard & remote browser-based set-up
- Biometric options for increased personal security
- Programmable function keys
- Ergonomic design with angled card slot
- Works in all WAN and LAN environments, including WiFi, modem, and Ethernet

Global series INCLUDES:

Battery-backed real-time clock, 12- or 24-hour, USA or International (quartz precision)

0 - 9 numeric keypad with Clear/Enter Keys

Onboard and remote browser-based configuration and diagnostics
10/100BASE-T Ethernet with DHCP

Optional: UPS, Power-over-Ethernet, Internal Modem, Security Encryption, DI/DO, Barcode and Magnetic Readers, SmartCard Readers, and much more!
